

A pixelated, black and white logo. The word "RADIO" is written in a large, bold, serif font. Below it, "FM 104.5" is written in a smaller, sans-serif font. The entire logo has a dithered or pixelated appearance.

The figure consists of two horizontal bars. The top bar represents the frequency of internet use, and the bottom bar represents the frequency of computer use. Both bars are divided into segments of varying shades of gray, indicating different response categories. The top bar has a small light gray segment on the left, followed by a medium gray segment, then a large dark gray segment, and a small light gray segment on the right. The bottom bar has a small light gray segment on the left, followed by a medium gray segment, then a large dark gray segment, and a small light gray segment on the right.

A large, pixelated, black and white graphic of a stylized letter 'Z' or '3'. The shape is composed of thick, blocky lines with a jagged, digital appearance. It features a horizontal top bar, a diagonal stroke descending from the left, and a horizontal bottom bar. The overall style is reminiscent of early computer graphics or a low-resolution digital font.
